

WAS MISERABLE COULDN'T STAND

Testifies She Was Restored to Health by Lydia E. Pinkham's Vegetable Compound.

Lackawanna, N. Y. — "After my first child was born I felt very miserable and could not stand on my feet. My sister-in-law wished me to try Lydia E. Pinkham's Vegetable Compound and my nerves became firm, appetite good, sleep elastic, and I lost that weak, tired feeling. That was six years ago and I have had three fine healthy children since. For female troubles I always take Lydia E. Pinkham's Vegetable Compound and it works like a charm. I do all my own work." — Mrs. A. F. KRAMER, 1574 Electric Avenue, Lackawanna, N. Y.

The success of Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, is unparalleled. It may be used with perfect confidence by women who suffer from displacements, inflammation, ulceration, tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Lydia E. Pinkham's Vegetable Compound is the standard remedy for female ills.

Women who suffer from those distressing ills peculiar to their sex should be convinced of the ability of Lydia E. Pinkham's Vegetable Compound to restore their health by the many genuine and truthful testimonials we are constantly publishing in the newspapers.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

NOTHING TO WORRY ABOUT

Little Jimmy's Explanation of the Per-
apiration No Doubt Satisfied His
Fond Mother.

Senator Clarence D. Clark of Wyoming smiled the other day when reference was made to the bright sayings of the kiddie folk. He said he was reminded of a small party named Jimmy.

One afternoon little Jimmy had been playing rather strenuously in the street. When he returned to his happy home he had an overheated look. "Jimmy," exclaimed his mother, on seeing the youngster, "come here a moment."

"Yes, ma'am," obeyed Johnny, quickly hustling to his mother's side.

"What in the world have you been doing?" demanded the fond parent. "Your head is all perspiration."

"That's all right, mamma," was the indifferent response of Jimmy. "My roof leaks."

Important to Mothers

Feel All Used Up?

Does your back ache constantly? Do
you have sharp twinges when stooping
or lifting? Do you feel all used up—
as if you could just go no further?

Kidney weakness brings great discomfort. What with backache, headache,
dizziness and urinary disturbances it is
no wonder one feels all used up.

Dean's Kidney Pills have cured thousands
of just such cases. It's the best
recommended special kidney remedy.

sitting in Denver, has announced its
determination to fight the cigarette
to its extermination in Colorado.
Denver shippers have complained
to the State Utilities Commission for
a revision of switching charges im-
posed by railroads entering Denver.
Col. William E. Hughes of Denver
has sold to Texas parties a tract of
land between Littleton and Colorado
Springs for a consideration of \$750,
000.
Edna Puffer, who has eloped the
globe in the last few years as a man,
was arrested at Carbondale. Her
hobo pal says he did not know the
difference.
R. Guida of Firestone and George
Hall of Frederick were each fined in
the Weld County Court \$200 and costs
for selling liquor on Sunday. On Au-
gust 11 the same parties were as-
sessed \$100 and costs each for the
same offense.
A section man probably saved the
life of the five-year-old daughter of
Mr. and Mrs. George Williams at Lead-
ville by pushing her from the D. &
R. G. track with his foot as his car
rounded a curve and bore down upon
her on a grade.
John Zondek brought suit in the
Denver District Court against the Uni-
on Pacific Railroad Company for the
sum of \$2,999, alleging the loss of four
toes in alighting from a train on
which he had been permitted a free
ride.
Denver & Rio Grande engineers who
are running the survey of the cutoff
through Parosa Springs to Durango
are progressing with their work and
are over the range.
A Gilbert Gibson, a youth, pleaded
guilty to forgery on four counts at
Trinidad, and was sentenced to not
more than ten years in the reforma-
tory at Buena Vista.
The International Bank of Com-
merce at Pueblo closed its doors after
a run started, the officials say, after
false rumors had been spread. They
claim the bank is solvent and that it
will open again soon.
One hundred tons of scrap metal
property of the Book Cliff Railroad
Company, which has been accumulating
for twenty years, has been shipped to
an eastern ammunition firm which
will make shrapnel of it.
The Meeker town council has or-
dered signs at street intersections a la
metropolis.
One hundred and fifty farmers have
made subscriptions to the stock of the
new milk condensary at Loveland
which will complete the building and
install the machinery.
Spectators cheered when Ben Mc-
Anally, a cowpuncher, roped a run-
away team on Commercial street in
Trinidad and prevented certain dam-
age on that busy thoroughfare.
County fairs all over Colorado have
been reported to be unusually suc-
cessful this year. Perhaps the won-
derful crops, both on irrigated and
dry land, had something to do with it.

WATER USED BY MANY CROPS

Alfalfa, When Once Started, Can
Withstand Almost Any Degree of
Drought for Long Periods.

Drought resistance in crops does not
seem to be so much a matter of using
a small amount of water as of ability
to go after water in the soil or to wait
until moisture comes. This conclusion
may be drawn from investigations be-
ing made by the United States depart-
ment of agriculture in Colorado, to de-
termine the water requirements of
different kinds of plants.

Alfalfa is generally considered a
very drought-resistant crop; when
once started it can withstand almost
any degree of drought for long periods.
But to produce the same quantity of
dry matter alfalfa requires more than
twice as much water as does corn.
Alfalfa requires 331 pounds of water
for each pound of dry matter it pro-
duces. On the other hand, corn, which
is not considered very drought-re-
sistant, requires only 268 pounds of
water to produce a pound of dry mat-
ter.

All of the leguminous crops, includ-
ing peas, beans, vetches, alfalfa, sweet
clover, and other clovers, require large
amounts of water in proportion to the
dry matter they produce. Some of the
most common weeds, such as tumble
weeds, purslane and Russian thistles,
require a very small amount of water
in proportion to dry matter. The
cereal crops come between the legumes
and the weeds named. Wheat uses
512 pounds of water for each pound
of dry matter, and oats uses 597
pounds. Buffalo grass is one of the
most economical of all plants in its
use of water; it requires only 308
pounds of water to produce a pound of
dry matter.

In the Colorado experiments it was
necessary to protect the plants from
birds, winds and hailstorms by means
of wire-covered inclosures. The screen
reduced solar radiation to about 80
per cent of the normal. Under the
conditions of the experiment the av-
erage amount of water required to
produce one pound of dry matter with
each kind of plant was as follows:
Millet, 319 pounds; sorghum, 322
pounds; corn, 365 pounds; wheat, 512
pounds; barley, 531 pounds; buck-
wheat, 578 pounds; oats, 597 pounds;
rye, 685 pounds; flax, 905 pounds; soy
beans, 744 pounds; sweet clover, 770
pounds; vetches, 794 pounds; clovers,
797 pounds, and alfalfa, 831 pounds.

TO CULTIVATE SUDAN GRASS

Good Stirring of Soil After First Crop
Is Removed Will Greatly Help
Plants in Starting.

By R. E. KARPIS, Oklahoma Experi-
ment Station.

"Would like to know if it is ad-
visable or necessary to cultivate after
cutting first crop of sudan grass for
seed?"—M. B. Bliss, Okla.

Sudan grass should be cultivated as
soon as possible after the first crop of
hay is removed. A good stirring of the
soil at this time will be a great help
to the plants in making a good, strong
start toward the second crop. If the
ground has been kept clean and free
from weeds during the early part of
the growth of the first crop it will
not be necessary to cultivate frequent-
ly during the growth of the second
crop. Just enough cultivation to
maintain the desired soil mulch will
be needed in this case. By the time
the first crop has matured the plants
have stood and spread out in the
row to such an extent that it makes
any cultivation a much less tedious
operation for the second crop than is
the case with the young plants during
the early growth of the first crop.
Since the first crop is to be allowed to
stand for seed purposes the growing
period of the second crop will be
shortened several weeks at best, and
good cultivation will help considerably
toward increasing the yield of the sec-
ond cutting.

MOISTURE CAPACITY OF SOIL

Improved by Application of Manure—
Also Cheapest Means of Return-
ing Vegetable Matter.

The application of manure is the
cheapest means of returning organic
or vegetable matter to the soil and the
maintenance of a good supply of de-
caying organic matter is the first and
most important step in the mainte-
nance of the productive capacity of
the soil. It gives the soil better tilth,
increases the availability of the min-
eral elements of plant food and im-
proves the water-holding capacity of
the soil, in addition to being a source
of nitrogen as a plant food.—North
Dakota Experiment Station.

Protect Against Cholera.

The only means of protecting the
hog against cholera is by inoculation
with hog cholera serum, or with hog
cholera serum and virus.
The serum alone confers an im-
munity lasting from six to eight weeks,
while the double treatment (inocula-
tion of the hog on one side with
serum and on the other side with
virus) shows a lasting or permanent
immunity to hog cholera.

Retain Moisture in Soil.

The moisture that falls from the sky
is likely to be sucked up again unless
prevented. Frequent, shallow cultiva-
tion means that it will be retained in
the soil.

Establishing Alfalfa.

The sowing of alfalfa in wide rows
and giving cultivation between the
rows has proved to be the most cer-
tain way of establishing this great
crop in all the different areas.

Value of Draft Mares.

A well-matched pair of purebred
draft mares ought to be worth, in
spite of the autos, \$1,000 apiece and
properly bred stallions will bring even
more than this.

Keeping Colt From Mother.

In keeping the colt from following
its mother it should be confined in a
place where it cannot see her.

FARM ANIMALS

EXPERIMENT WITH HOG FEED

Illustration Shows Difference in Size
of Animals Fed on Alfalfa and
Corn and Corn Alone.

The pigs shown in the illustration
were litter mates fed at the Kansas
experiment station. The big pig was
fed on a ration of corn and alfalfa
hay; the little pig on corn alone. The
experiment was carried on for eight

Balanced Feed.

months. The alfalfa-corn pigs av-
eraged 250 pounds dressed; the cor-
n-alone pigs but 60 pounds each. Pigs
must have protein. There is plenty
of it in alfalfa. The balanced ration
made the difference.

PROTECT STOCK FROM FLIES

Department of Agriculture Rec-
ommends Mixture of Soap and Kero-
sene—Use Spray or Wash.

By CHARLES I. BRAY, Colorado Ex-
periment Station.

During the summer months, when
cattle are most likely to be bothered
with flies, there are many people
who wish to know what can be done
as a preventive. There are a num-
ber of methods sometimes recommend-
ed for this purpose, some of which are
supposed to keep flies off the animal
by virtue of their bad odor or greasy
nature, and some which are supposed to
be sprayed on to kill the flies. Con-
siderable doubt exists as to the
benefits to be obtained from using
any of these treatments, or as to the
relative value of the different ways
of combating flies.

For spraying the backs of cattle at
milking time, there is possibly noth-
ing more reliable than kerosene
emulsion. The following recipe
given by the United States department
of agriculture is one of the best ways
of making this: Dissolve one-half
pound of hard soap in one gallon of
hot water, and while still at near boil-
ing point add two gallons kerosene,
and emulsify by use of a force pump
or agitator of some kind. Dilute with
water, one part emulsion to eight
parts water, and use as a spray, dip
or wash.

SUITABLE DOGPROOF FENCE

Arrangement Tried by Government
Rangers and Found Satisfactory—
Height Is 57 Inches.

On one of the government's forest
ranges this fence has been tried for
three months and found to be dog and
coyote-proof. Not a coyote made his
way through it. Posts are set 16 feet
apart. They are 7½ feet long and set

2½ feet from the ground. The lower
wire lies flat on the ground. The
number on the cut indicates the inches
between wire. "ranus," is total height
of the fence—57 inches. The woven-
wire fencing is 35 inches high and has
a four-inch mesh.

SHEEP REQUIRE SOME SHADE

Best Place for Shed Is on Open
Ground Where There Is No
Grass—High Fence Will Do.

Do not allow the sheep to lie around
in fence corners or huddle in under-
brush. The best shade is a shed on
open ground where there is no grass.
A little bit of shelter is fine for
sheep. Even if it be nothing more
than a high board fence on the side
toward the sunshine it will help a lot.
The sheep can snuggle up near to
that and escape the direct rays of the
sun.

Better than such a fence is a place
of woodland. We have a cluster of lit-
tle hemlocks in our pasture, up on a
side hill, says a writer in an exchange.
The sheep run up into that and escape
not only the heat, but also the miser-
able flies that hurt them so.

Examine Ram for Ticks.

It is a good plan to examine the
ram once in a while for ticks, and if
any are found he should be thorough-
ly soaked with a few gallons of a dip
preparation. This can easily be done
with a hand-sprinkler while the ram
is in a standing position.

Time to Wean Colts.

Wean the colts at five months of
age. If you can put two or three to-
gether in a small paddock they will be
company for each other and will be
easier to wean. If they have been
eating grain and grass for a month or
more there will be little trouble or set-
back in weaning them.

Opening for Sheep Raiser.

The opening for the sheep raiser
is very wide. Sheep are very scarce.
They are good property on the farm
and pay well year in and year out.

WHY DINING CAR CHEFS PREFER KC BAKING POWDER

Those who have had cakes ruined by jarring the
stove, slamming the oven door or a heavy footstep, may
have wondered how the dining car chef can turn out such
marvelous biscuits, hot breads and pastry when his oven
is being incessantly jarred and jolted and shaken by the
motion of the train.

To get pastry to raise and stay raised under these con-
ditions, a baking powder must be used that continues to give off
its leavening gas—that sustains the raise—until the dough is
baked through.

Dining Car Chefs have found a baking powder exactly suited
to their needs in K. C. and you will find it just as well suited to
your requirements. K. C. is really a blend of two baking powders,
one active as soon as moistened, the other requiring both mois-
ture and heat to start the generation of leavening gas. No matter
how moist and rich you make your cake, K. C. Baking Powder will
sustain the raise until a crust is formed and all danger of falling
is past.

K. C. Baking Powder is pure and healthful. It is guaranteed
under all pure food laws, and is guaranteed to please you. And it
is sold at a reasonable price—no baking powder should sell for more.
Try a can at our risk and be convinced.

ENSIGN ONLY OFFICER LEFT

Incident Shows the Fierce Nature of
the Fighting at the Battle
of Tippecanoe.

The Indians returned to the attack
with redoubled fury. An entrance into
the camp was effected, and for a few
minutes it looked as if the soldiers
might be overwhelmed.
Many officers went down under the
fire of the Indians. Harrison's horse
was killed. He mounted another and
quickly disposed his troops to better
advantage. When his lines were re-
established not an Indian that had
reached the camp was alive.

A story is told that illustrates the
terrible losses of the Fourth Indiana
regiment. General Harrison, riding
furiously toward the point of greatest
peril, encountered a mere boy with
blood-stained head working heroically
to stem the Indian attack.
"Young man," asked the general,
"where is your colonel?"
"Dead, sir."
"Your major?"
"Dead, sir."
"Your captain?"
"Dead, sir."
"Who commands the regiment?"
"I do, sir. Ensign Tipton, Fourth In-
diana, sir."—Kansas City Star.
